Yellow Wasp

Life Cycle Of Wasp

Characteristic

- These large wasps are easy to recognize by their bright gold color. The word 'flavus' is Latin for yellow or golden.
- only the females sting. Males have much longer antennae and the ends have a sharp right angle bend.
- Males have much longer antennae and the ends have a sharp right angle bend.

Nest

- The thin paper hexagonal-shaped nest (comb) is often found under a building overhang and is attached by a petiole-like structure. In spring, the female chews wood fibers which when mixed with saliva forms the 'paper' to make the hexagonal-shaped cells.
